RATIONAL

One point perspective was easy and one of my favorite things to do out of all the drawing excercises. The 2 point perspective was a challenge but I got the hang of it quickly. The hardest shapes for me was the silinder and sphere. For the life of me could I not figure out the sphere, but I tried my best to achieve it. My other favorite exercise was adding shadows to the shapes.I got me really good pencils and at the end of al the excercises I could see my improvement. I got really excited about it. All in all some of it was a challenge but I tried my best to get it right.
