Course	Higher Certificate in Design Thinking
Class	Design Studio
Project No.	One
Project Name	Homo-cubis
Student Name	Charmoné
Student No.	382019

GREENSIDE DESIGN CENTER

RATIONAL

The airplane helped me to perfect my folding skills as well as the geometric shapes. It ultimately helped me to fold the final design. Some of the geometric shapes were a bit tricky to fold, but in the end, I learned thicker paper helped a lot. The shapes began to come together beautifully, and I felt a sense of accomplishment with each completed piece. Although it did take the longest to do. I really struggled to think of ten traits that would work as a design. It took me a while to finally have all ten. I also learned that I am a perfectionist when it comes to my drawings, and that was a challenge because I spent a lot of time on one character at a time. It also took me a long time to do research for one character at a time and to finally decide on what hairstyle, eyes, mouth, and nose fit the design of the character. The final three ideations were quite easy to choose. I chose the three that are my strongest traits, and I did decide to combine two characters for one of my final three. Designing the final character was also easy, but I ran into a problem while constructing the template. I did not know that the torso was flipped on the template, which means my design was the wrong way around. Luckily I printed two templates, but time was of the essence, so I had to quickly draw a new torso. Personally, I do believe my final came out pretty good, and I am proud of myself.

WEEK 1

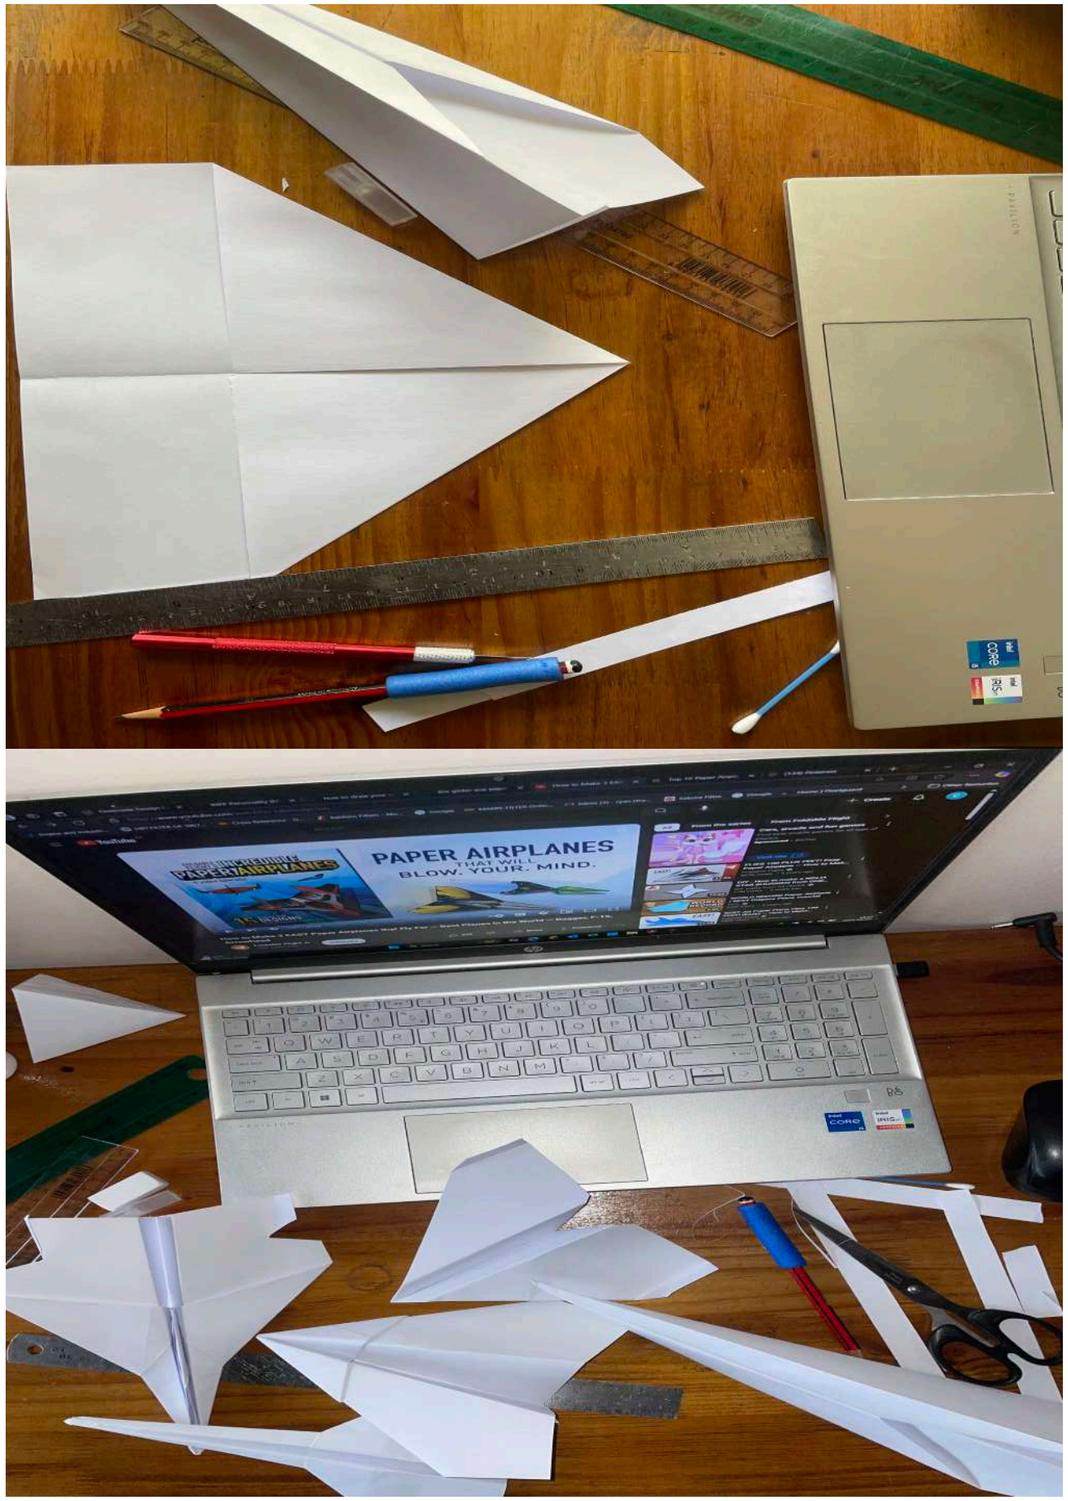

Figure 1.1: Paper Plane DT exercise - Process of Making the Plane [Photograph]. (Strauss, 2025).

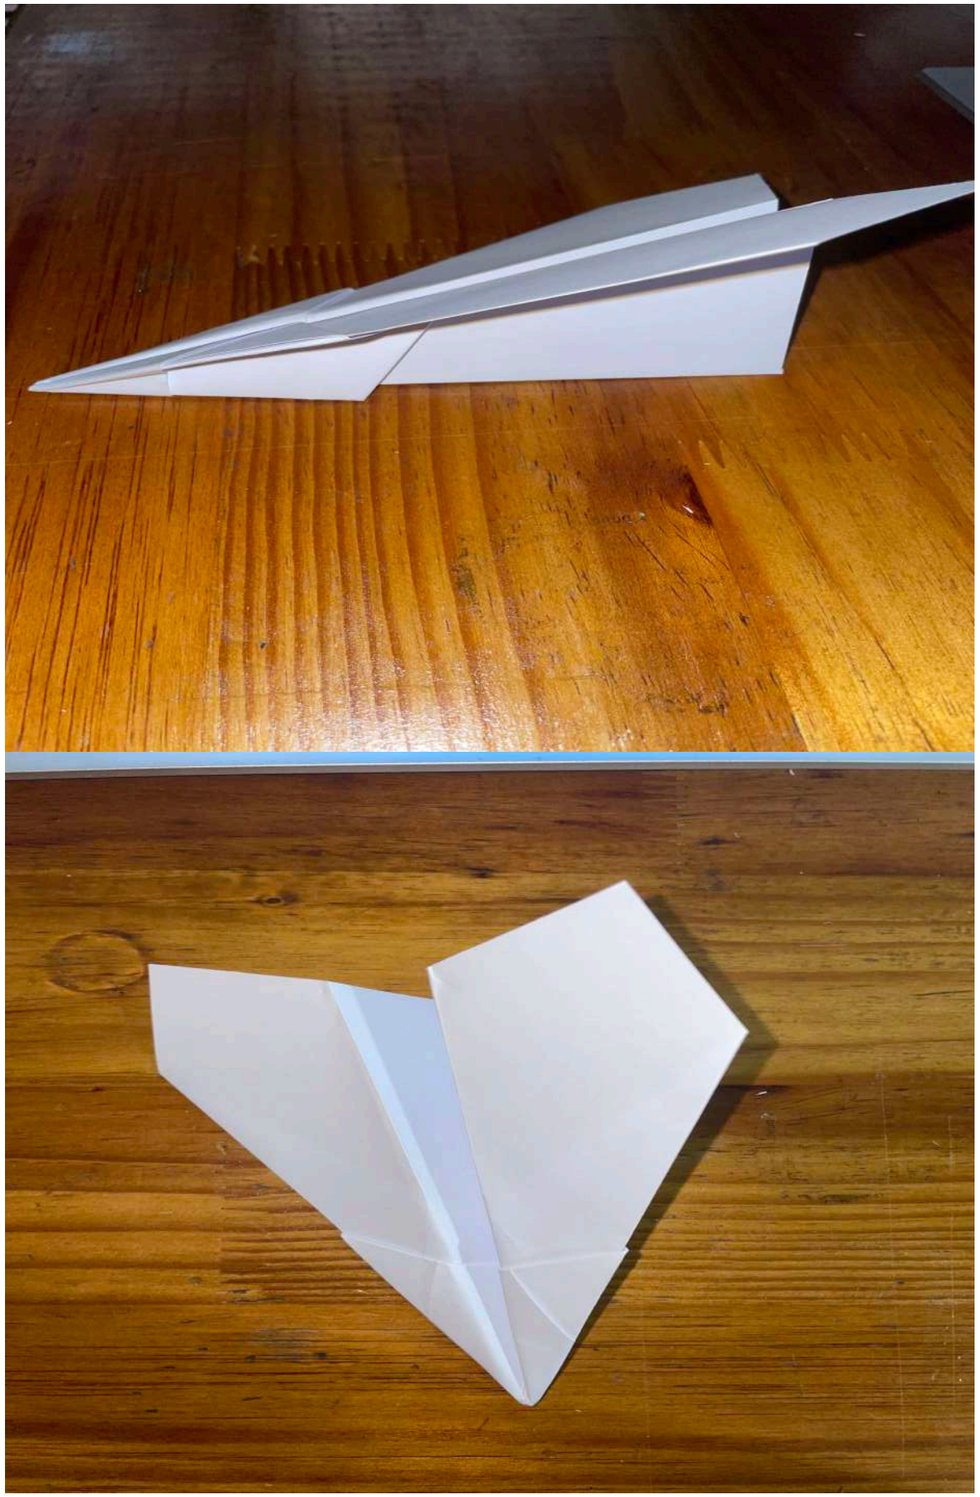

Figure 1.2: Paper Plane DT exercise - Finished Plane ready for the race [Photograph]. (Strauss, 2025).

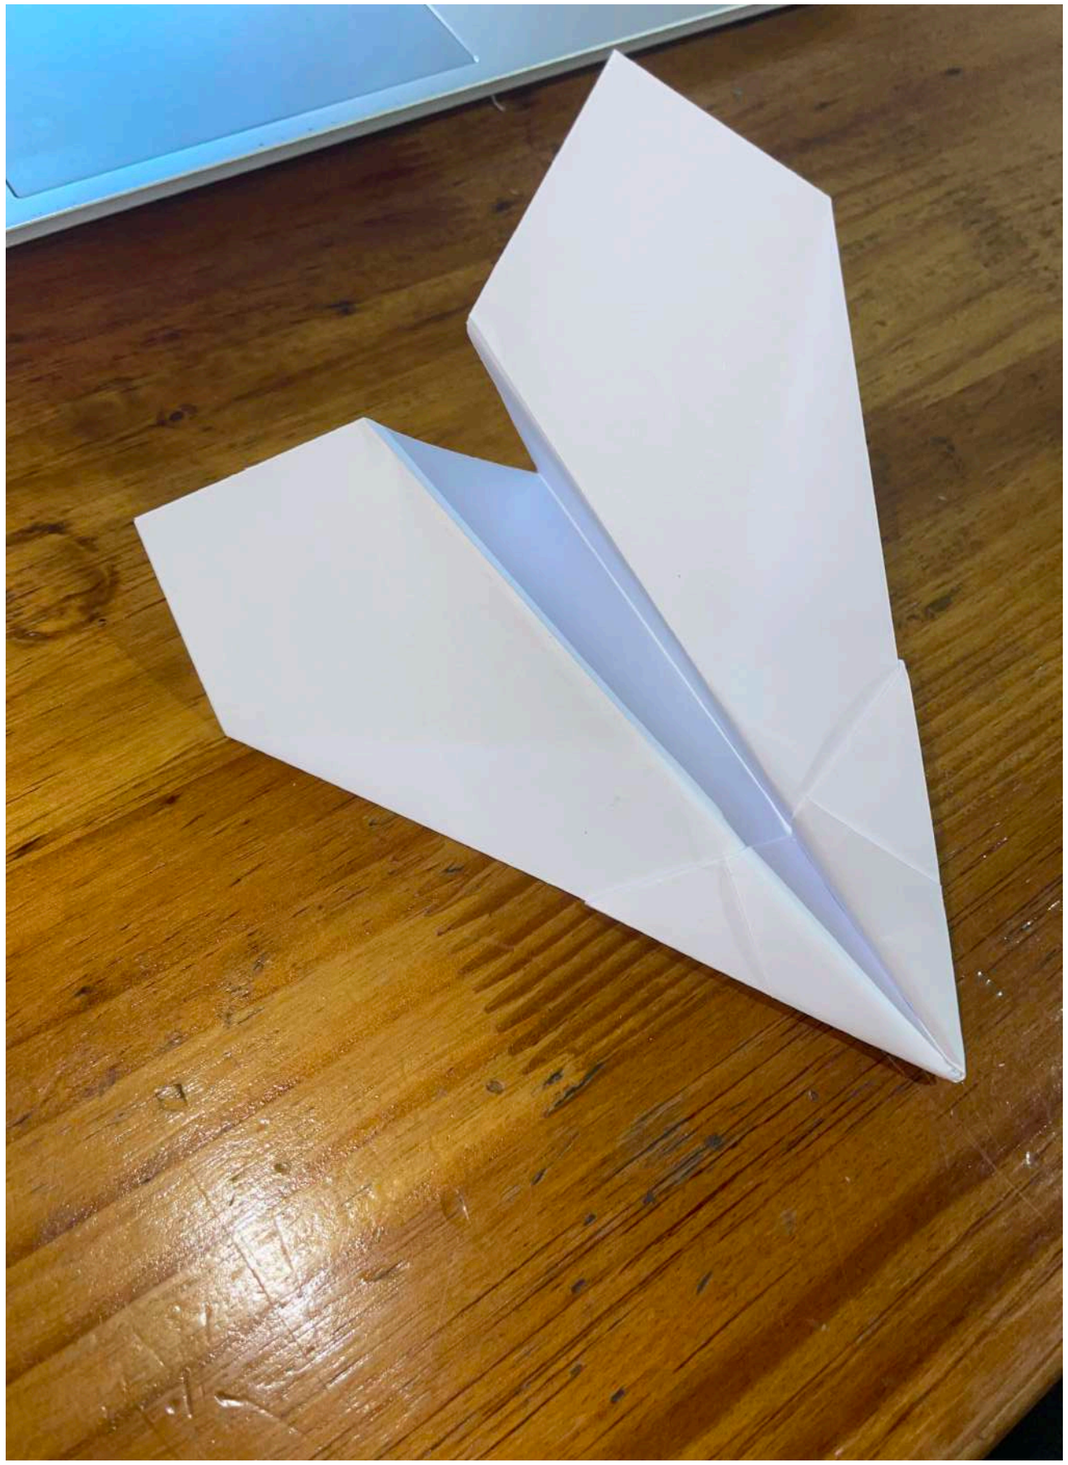

Figure 1.3: Paper Plane Race
[Photograph]. (Strauss, 2025).

I was quite anxious for the first day. I did try to engage as much as possible with my peers. I am a really shy person and these interactions was out of my comfort zone. I had to navigate new social dynamics. Although it did help me to start getting out of my comfort zone and learning to stop being so shy. My understanding of the first activity was mainly a fun activity to get to know the people who is studying with me. The second thing was to practice my folding skills and to do research on the best folding technique for a plane that can fly far. this task shaped my perspective of the learning environment as fun and something to enjoy doing instead of a burden. My expectations were quite high of the institute, my peers and lecturers. I immediately knew that I chose the right path to follow.

WEEK 2

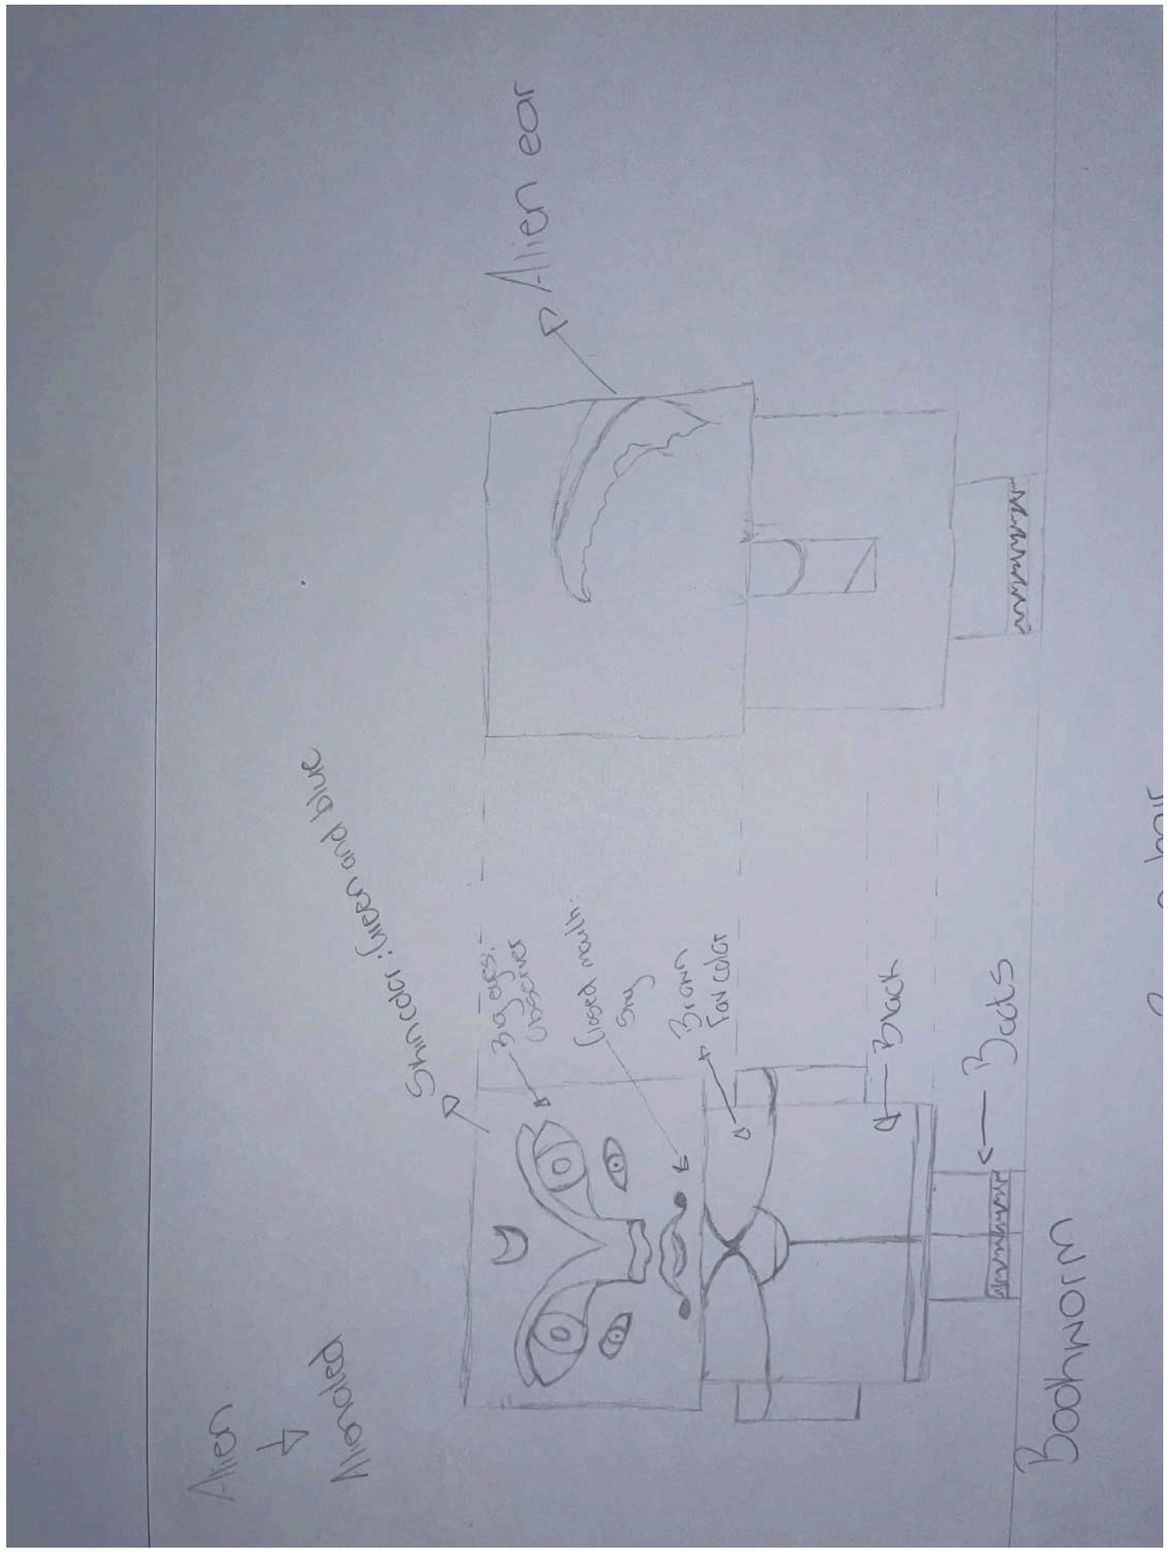

Figure 2.1: Character Ideation Sketch [Photograph]. (Strauss, 2025).

CHARACTER IDEATION 01.

This character is designed to be an alien.I decided to call the design alienated.The big eyes are there to represent that I am more of an observer and the small closed mouth is to represent that I am not much of a speaker. I chose an alien because I mostly feel alienated in my family aswell as regarding friends . I struggled to make friends most of my life and only had 2 to 4 friends at the most. I chose all these similarities to try and show who I am.

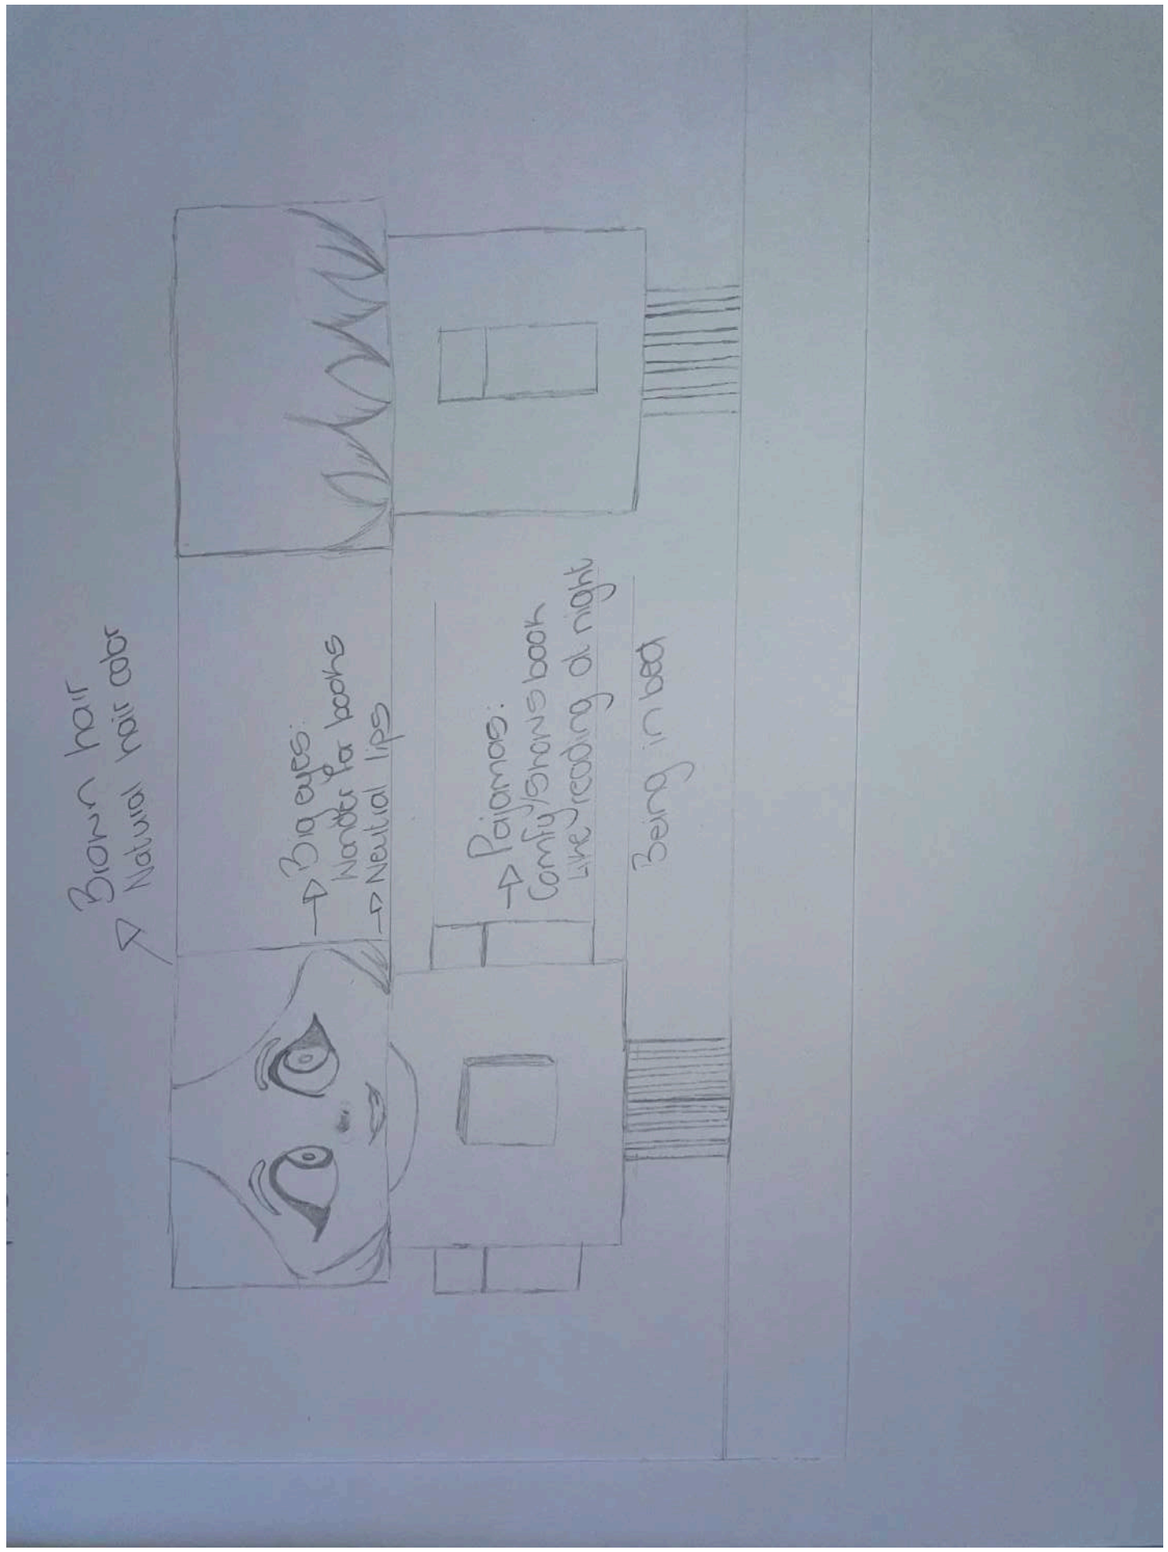

Figure 2.2: Character Ideation Sketch
[Photograph]. (Strauss, 2025).

CHARACTER IDEATION 02.

This character is deisgned to show my bookworm side. I am a very big reader. It is my safe space and my home away from home. I chose to draw big eyes because when I'm reading I am fully immersed in the story.The lips are neutral since I am mostly enjoying the book. The clothes aree pajamas to show that I love being comfortabe while reading. Also being in bed while reasing these books. This is fully who I am while reading

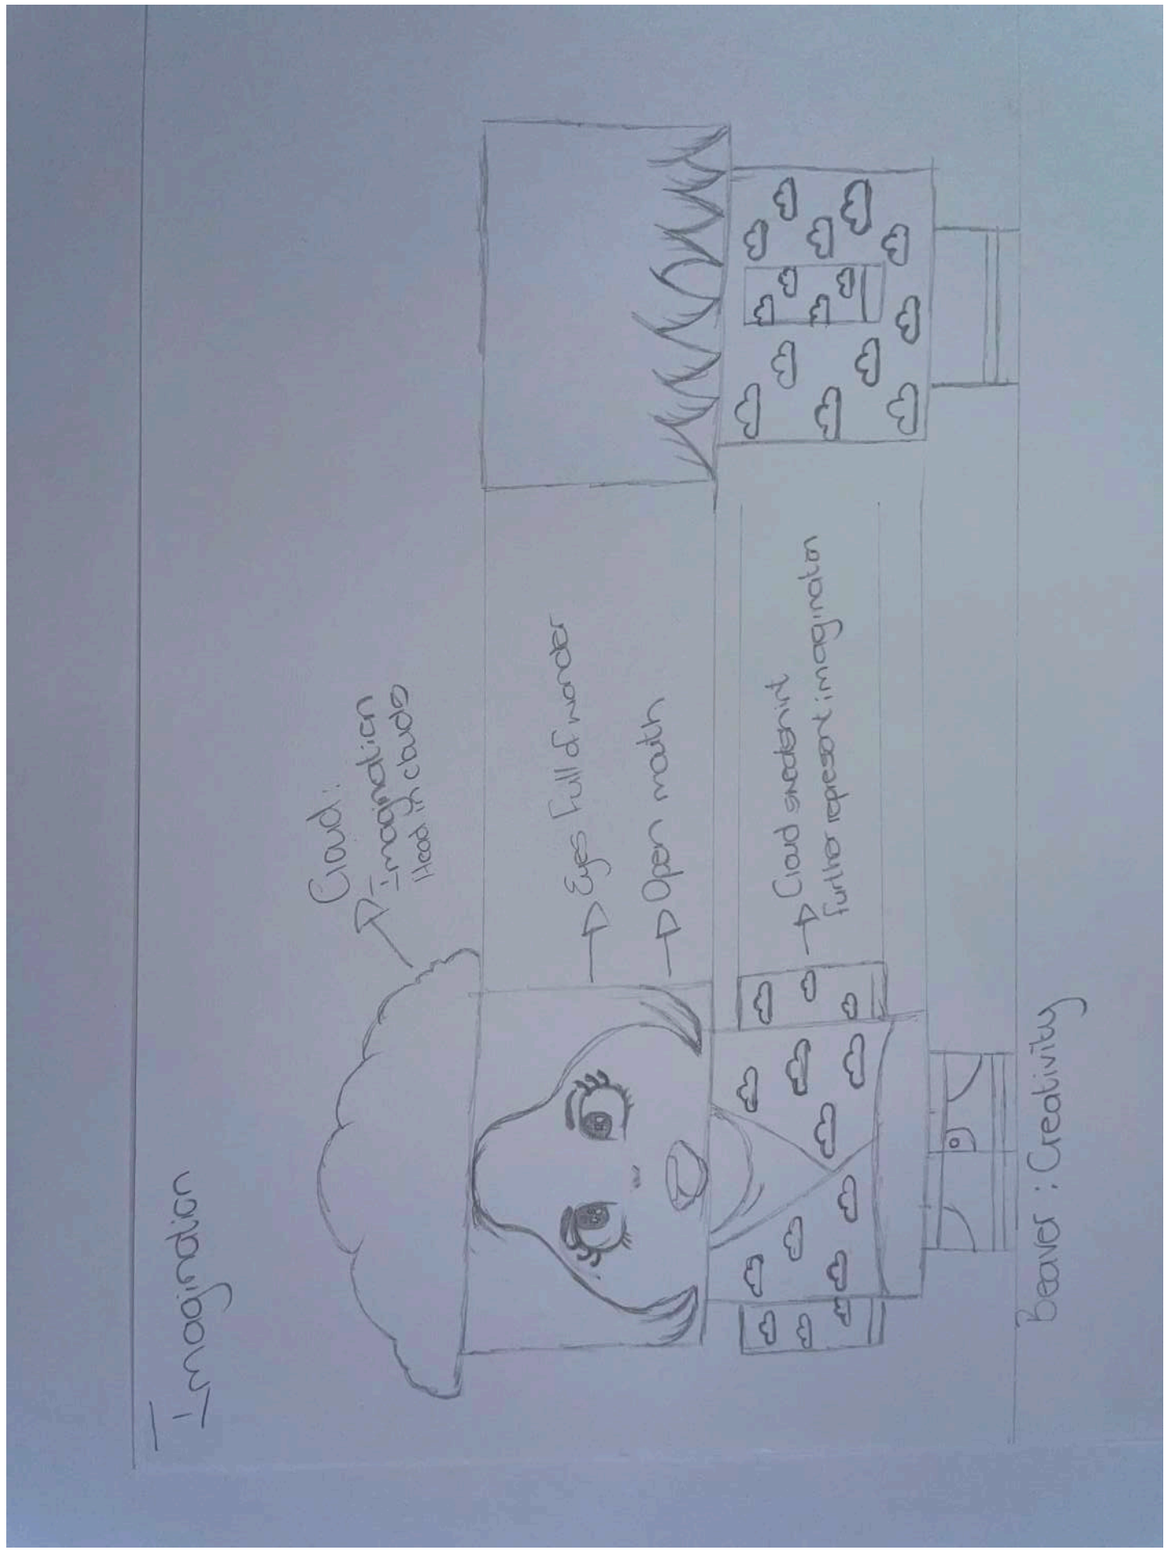

Figure 2.3: Character Ideation Sketch
[Photograph]. (Strauss, 2025).

CHARACTER IDEATION 03.

I am a very imaginitive person and I wanted to portray that in a character design.
In this design I drew a cloud on top of the characters head to show that my head is always in the clouds and my imagination is always far away. The eyes has a sparkle in them to show that they are always full of wonder. The open mouth further represents the wonder. The cloud sweater is also to show imagination.

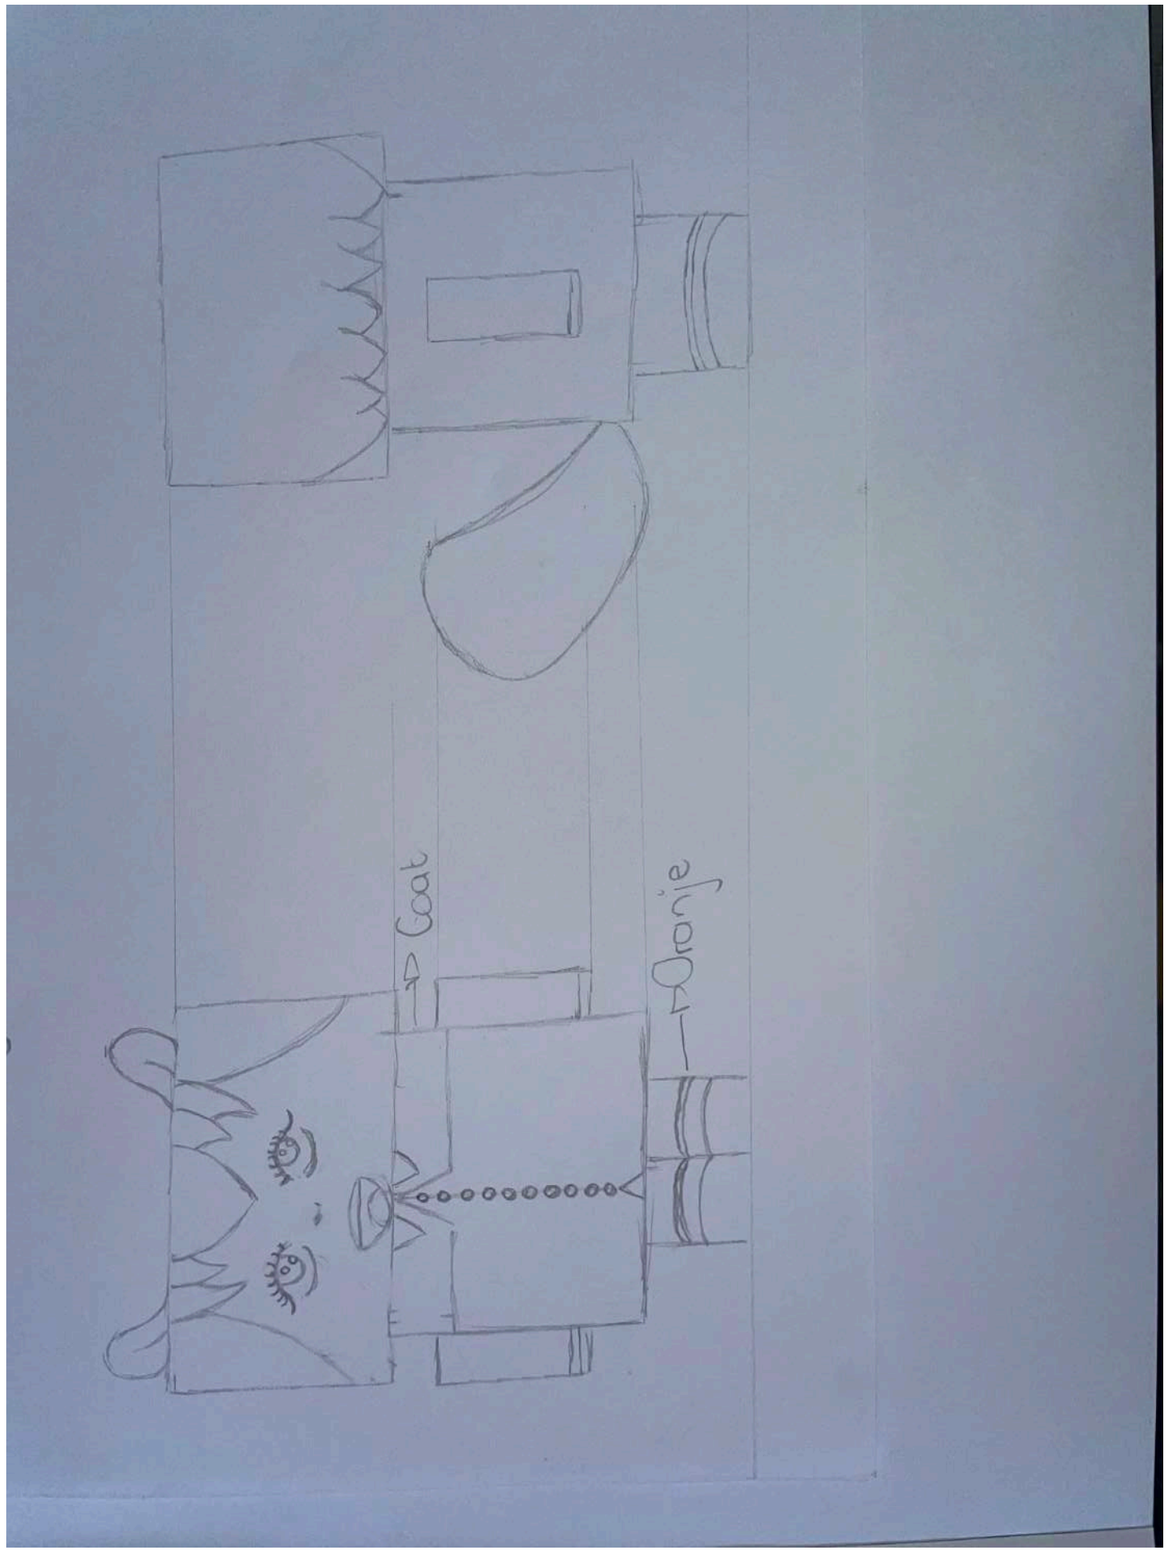

Figure 2.4: Character Ideation Sketch [Photograph]. (Strauss, 2025).

CHARACTER IDEATION 04.

For this design I decided to do a quiz to know what type of animal I would be. At the end I got a beaver. Beavers are notorius creative animals. I would like to think that I am quite a creative person. I love to make things for the people I love and help with creative things my brother needs for school. I chose to give this character a beaver tail and ears. The design has a happy facial expresion to show that I am in my happy place when I am creative.

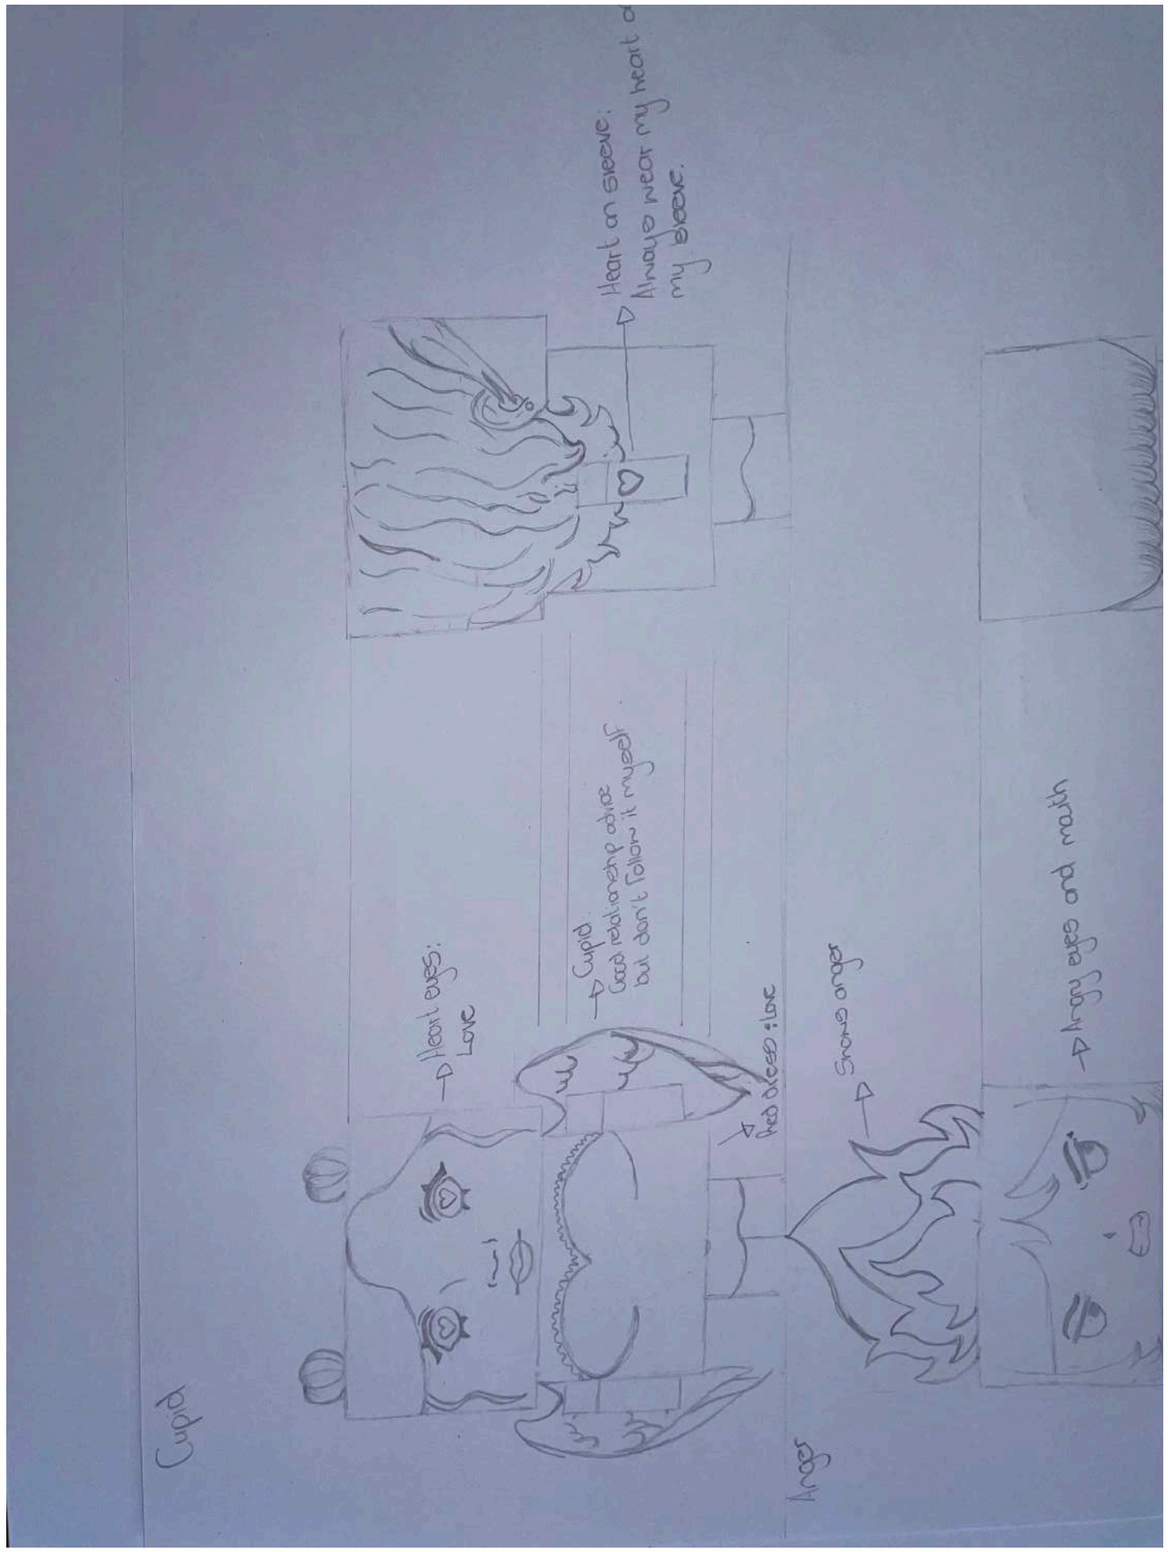

Figure 2.5: Character Ideation Sketch
[Photograph]. (Strauss, 2025).

CHARACTER IDEATION 05.

I am a very loving person. I am really big on loving those closest to me. That is why I chose my own version of cupid.In the eyes of the design there is hearts to represent love.I also drew cupid because I give great relationship advice but don't necissarily follow it myself. The dress of the character is red or pink because those are the colors people correlate to love. On the side view there is a heart on the sleeve to show that I always wear my heart on my sleeve. I love deeply and that isn't always a positive thing.

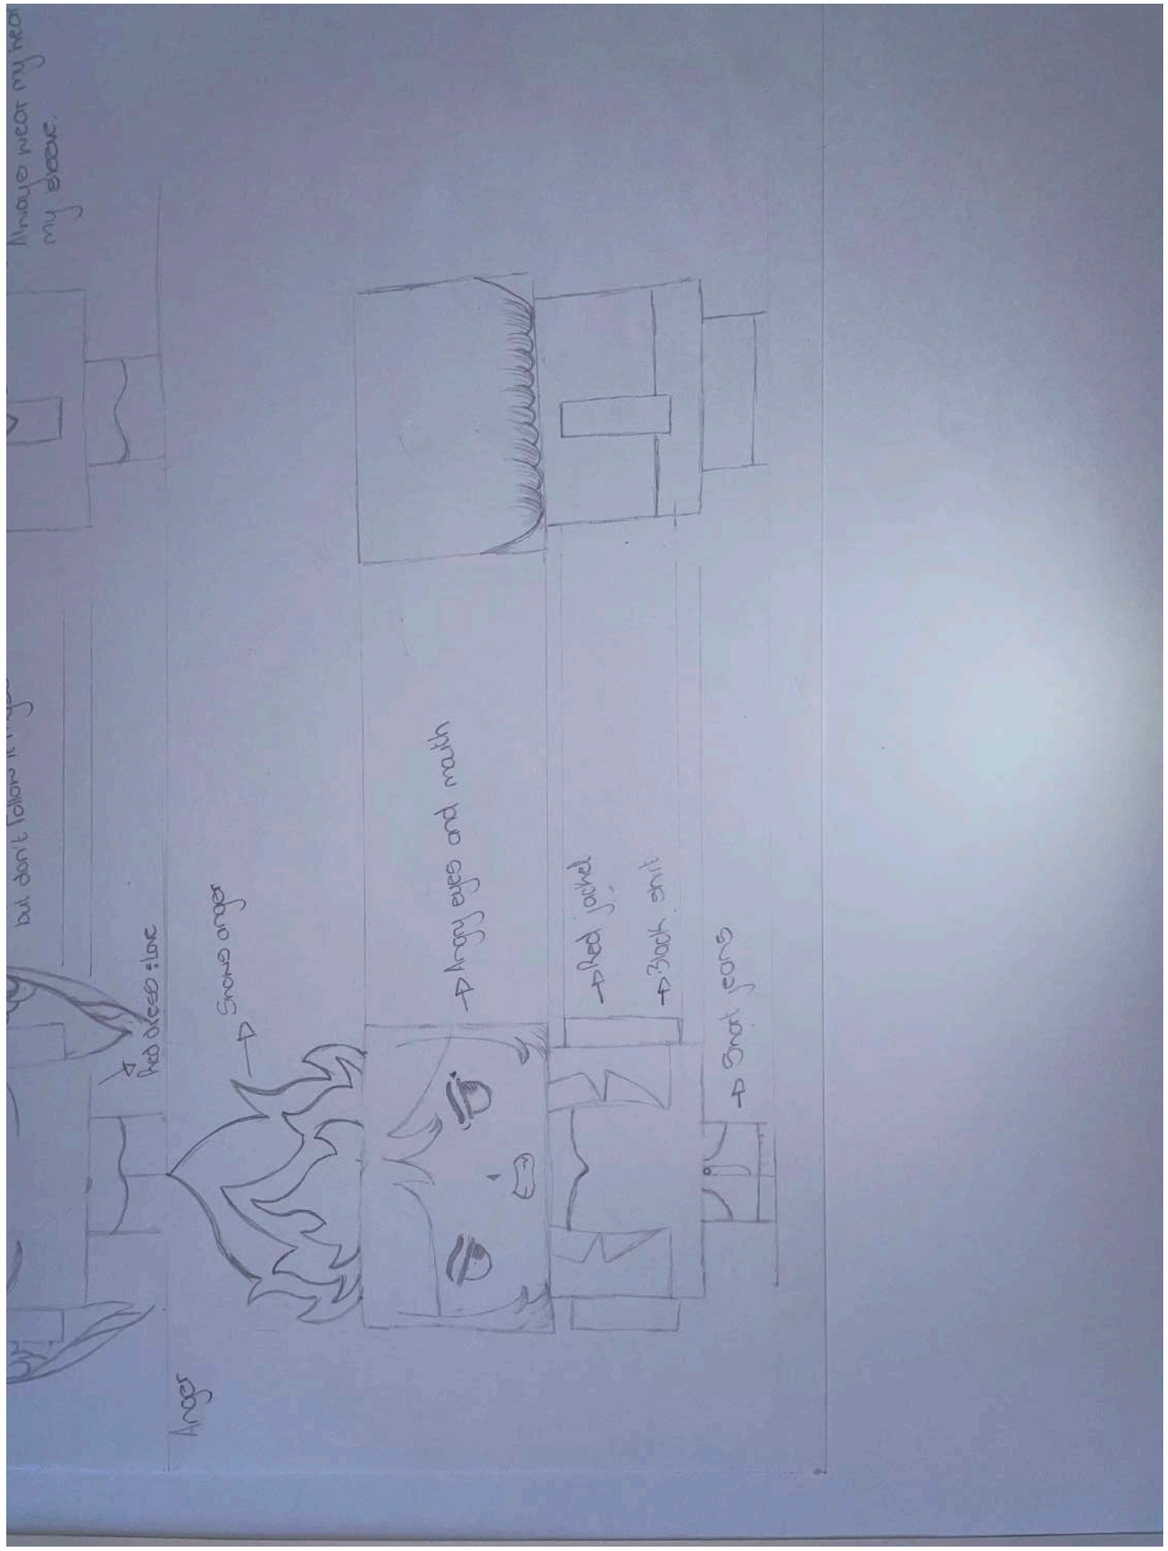

Figure 2.6: Character Ideation Sketch [Photograph]. (Strauss, 2025).

CHARACTER IDEATION 06.

Anger is one of my negative traits. I am a little bit short tempered and easily get angry. To show this I chose to draw a fire on top of the characters head. The eyes and mouth further represent this idea. The jacket is also red to tie into the fire on top of the characters head.

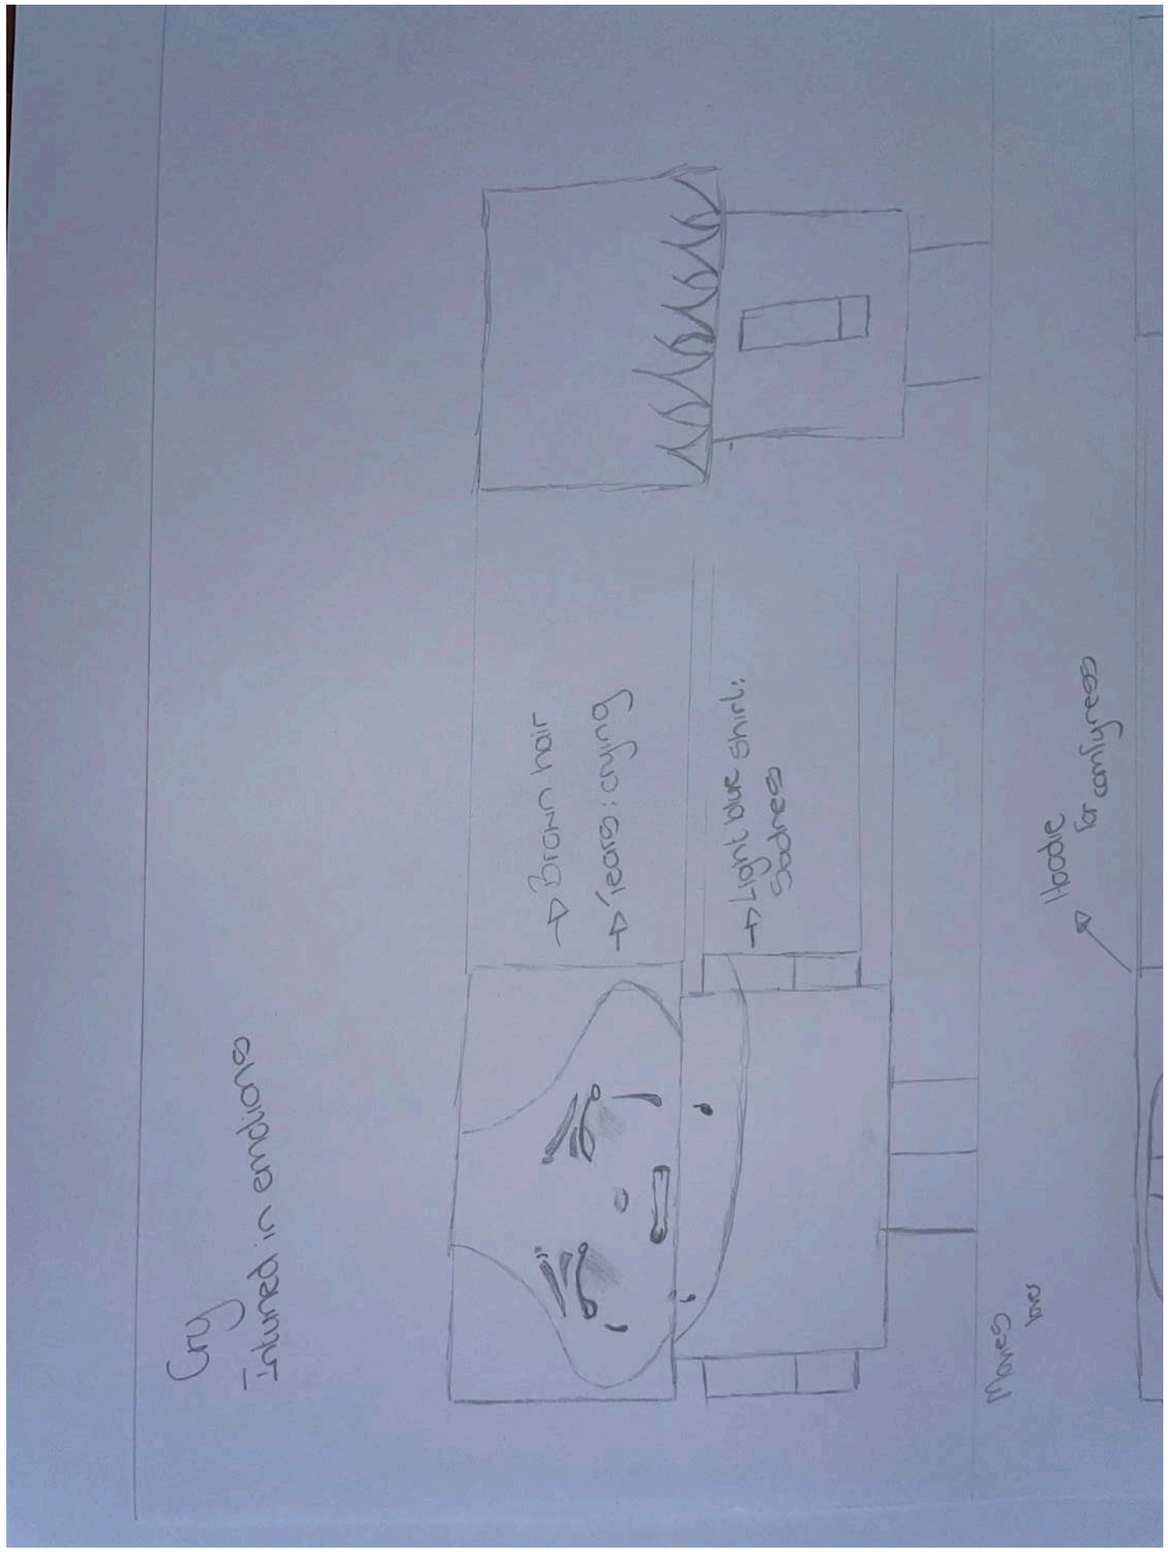

Figure 2.7: Character Ideation Sketch
[Photograph]. (Strauss, 2025).

CHARACTER IDEATION 07.

I am very intuned into my emtions and feel my emotions in immense power. I feel wholeheartedly and show my emotions easily. I am also a very big crier. Therefore I chose to show this by having this character crying. The eyes of the character is closed. the eyebrows are upturned as well and the mouth also shows this. The color of the shirt is light blue because this represents sadness.

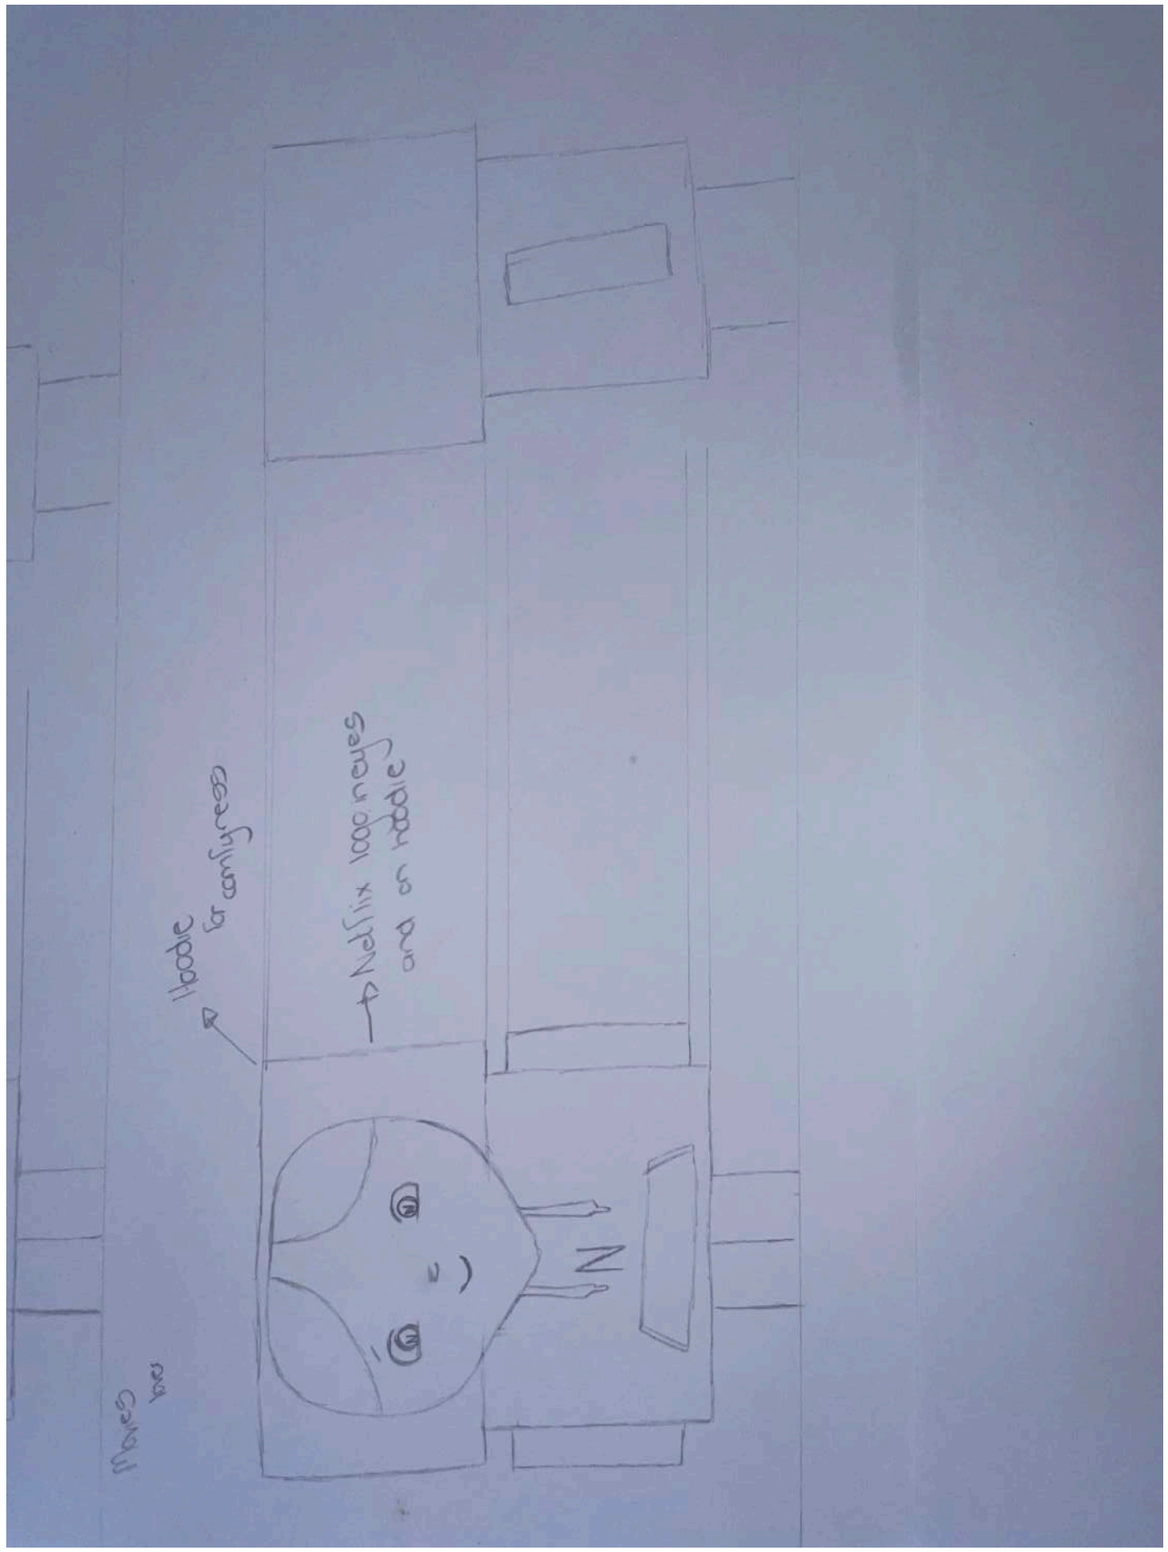

Figure 2.8: Character Ideation Sketch
[Photograph]. (Strauss, 2025).

CHARACTER IDEATION 08.

I named this character movie lover. Not only do I love reading, I also happen to enjoy a good movie. There a very few movies that I have not watched. it would be a shorter list to ask me what I haven't watched than asking what I have. To represent this side of me I chose to give this character a hood because I love to be comfortable while watching movies. The hoodie also has a netflix logo on it to show that this is what I am trying to represent. The eyes also has a netflix logo in them.

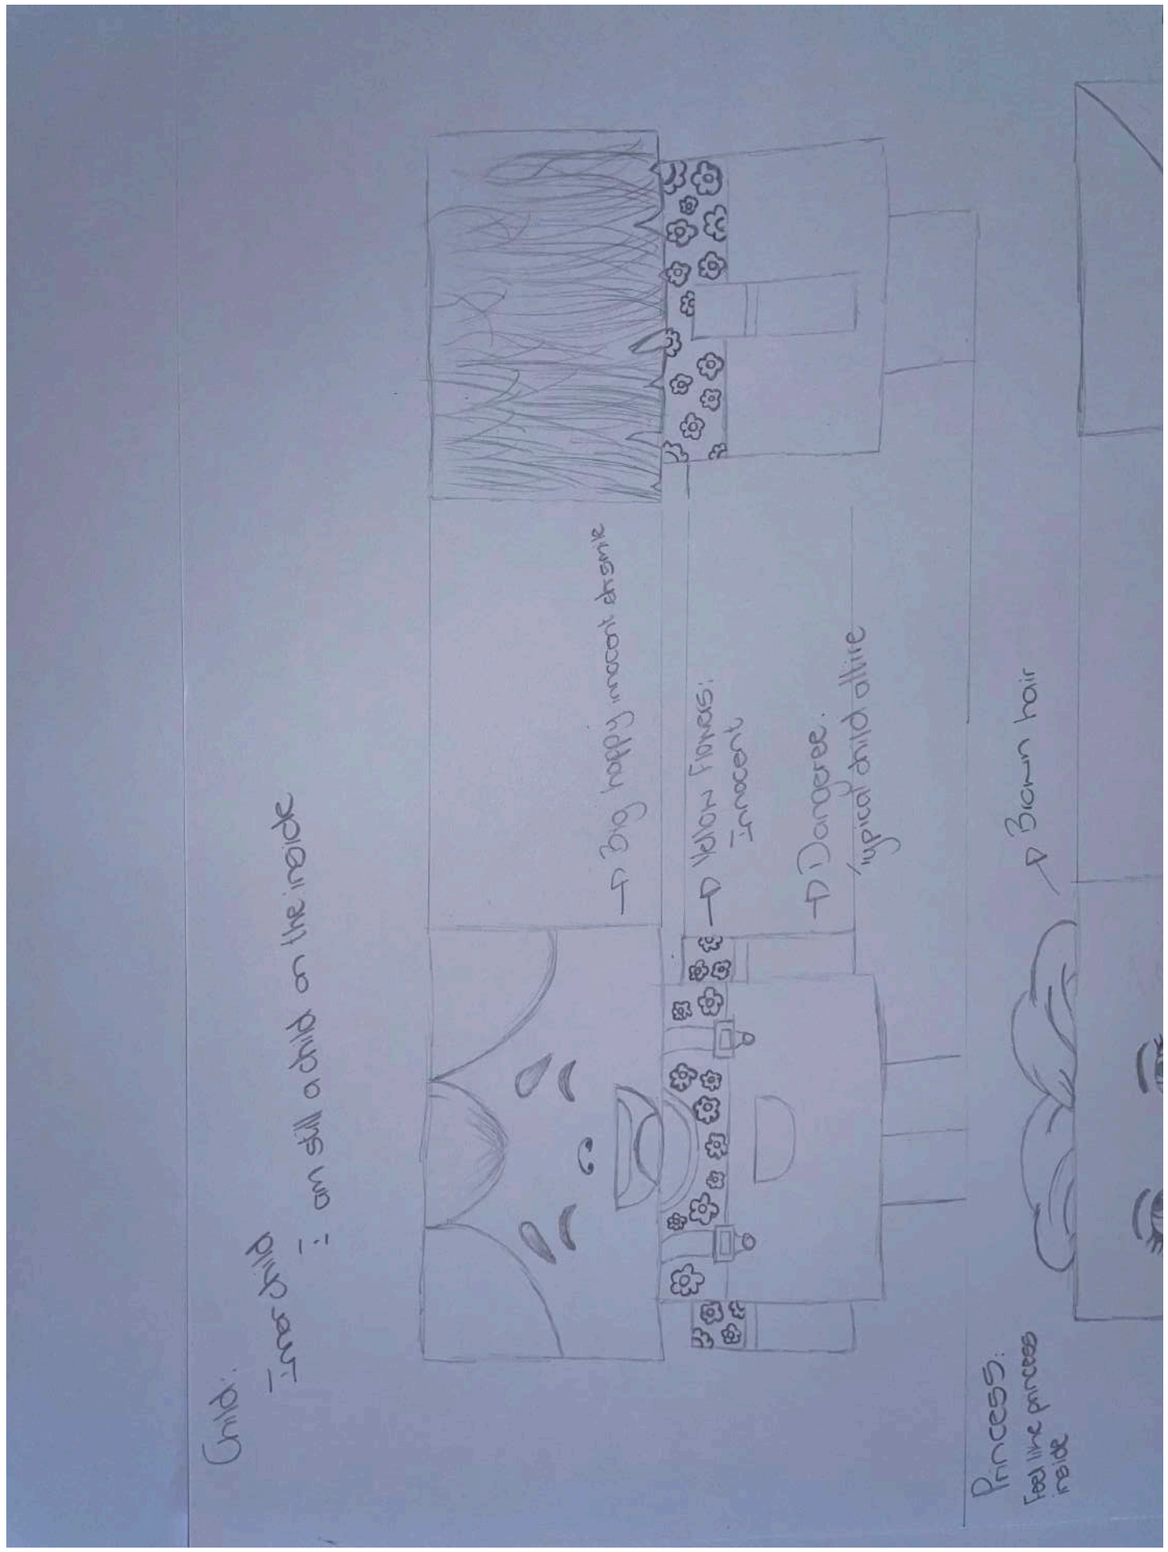

Figure 2.9: Character Ideation Sketch
[Photograph]. (Strauss, 2025).

CHARACTER IDEATION 09.

I like to think everyone still has an inner child. I happen to still love disney movies and miss the days of playing outside with my siblings, making mud cakes with not a care in the world. I also miss the happyness I felt as a child. The world has a way of dulling that happyness. To represent this I chose to draw this character with a big smiling mouth and closed eyes. The character is also wearing a dungeree because when I think of childhood I think of thta. The shirt under the dungeree has yelow sunflowers on it. Yellow represents happyness. The flowers also show that childlike innocence.

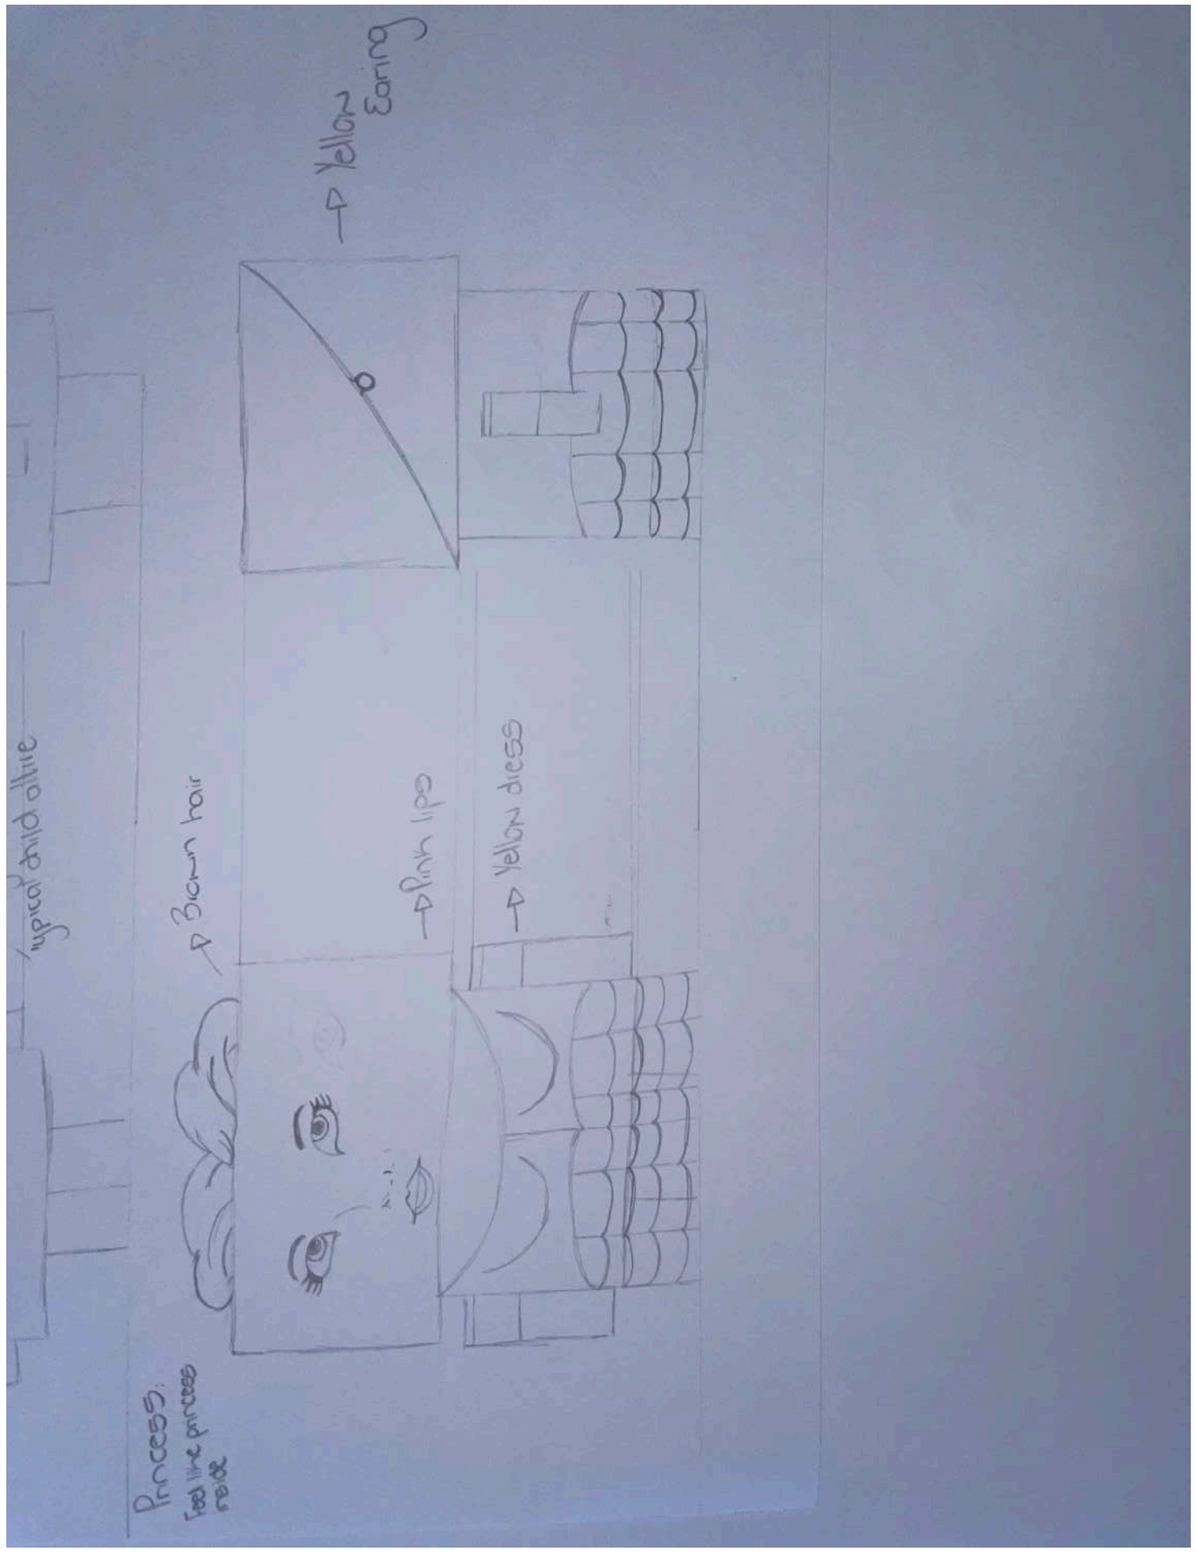

Figure 2.10: Character Ideation Sketch
[Photograph]. (Strauss, 2025).

CHARACTER IDEATION 10.

At heart I have always wanted to be a princess. I believe every women and girl have dreamt of being a princess. I chose to draw the princess I relate to the most. Princess Belle. She happens to be a very big reader as well. She also sees the beauty in every perso and brings out the beauty in even the most horibble person.She always seems to be happy. I feel like that is how I am as well. I have also gotten a few people who have said I resemble her a little bit.

WEEK 3

REFINED CHARACTER 001.

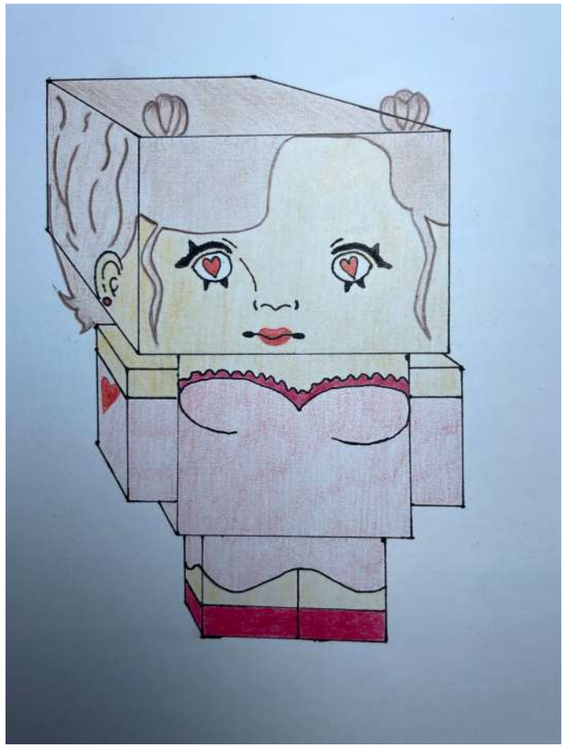

Figure 3.1: Refined Character Ideation Sketch [Photograph]. (Strauss, 2025).

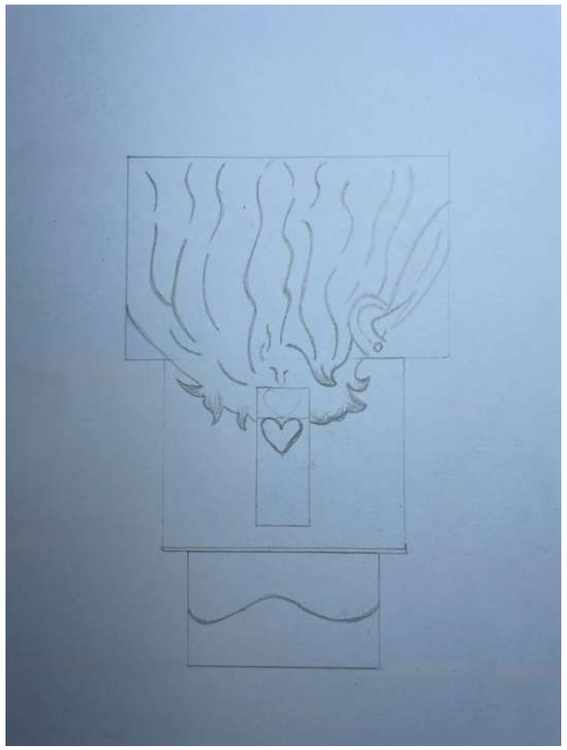

Figure 3.2: Three Quarter View [Photograph]. (Strauss, 2025).

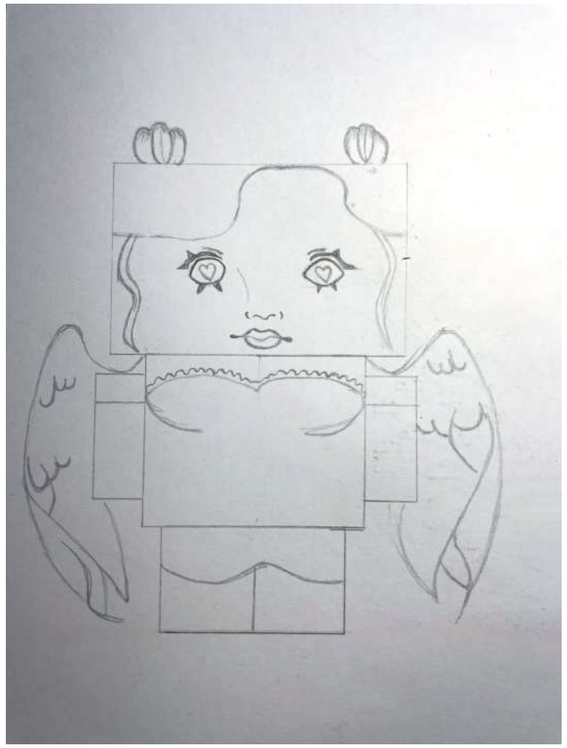

Figure 3.3: Front View of constructed character [Photograph]. (Strauss, 2025).

I chose this character for refinement because I resonate with this character more. It is one of my personality traits that shows the most. I did not change much. I only used a rular to draw out the character and tried to draw the features in proportion. I also decided to add color to the final.

REFINED CHARACTER 002.

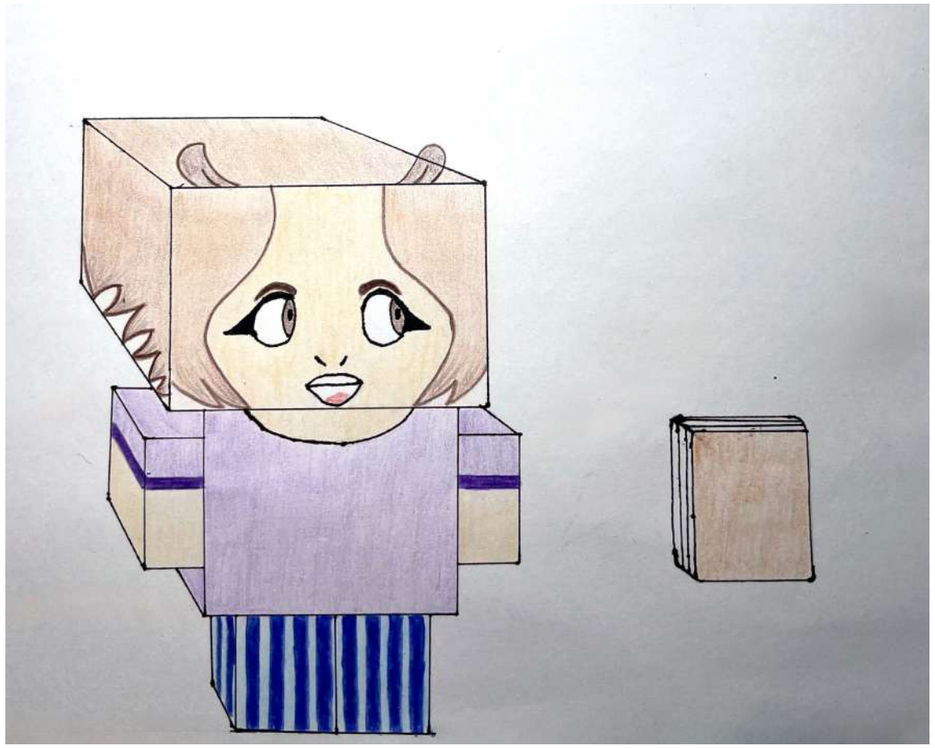

Figure 3.4: Refined Character Ideation Sketch [Photograph]. (Strauss, 2025).

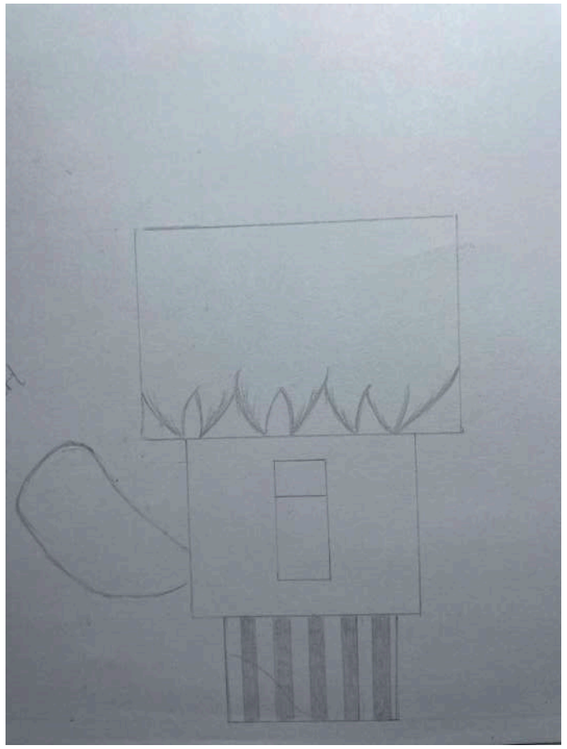

Figure 3.5: SideView [Photograph]. (Strauss, 2025).

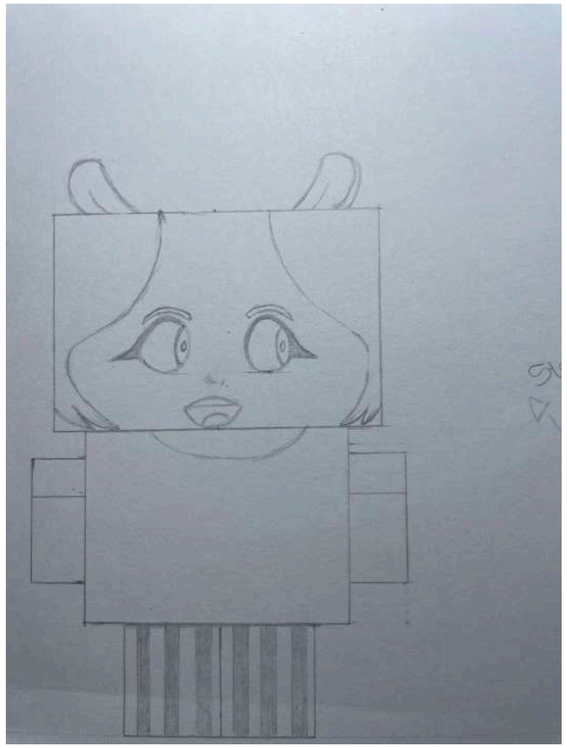

Figure 3.6: Front View [Photograph]. (Strauss, 2025).

I chose to join two character deigns mostly because they both go hand in hand with eachother. They are also one of my strongest traits. This charcater is my bookworm side and creativ side joined together. I chose to take the bookworm character and add in the beaver's ears and tail. Instead of a book drawn onto the shirt of the character I decided to add in a book as an additional prop that will be made to go with. These choices enhance the character design to represent more of these characteristics and to easily see who I am.

REFINED CHARACTER 003.

Figure 3.7: Refined Character Ideation Sketch [Photograph]. (Strauss, 2025).

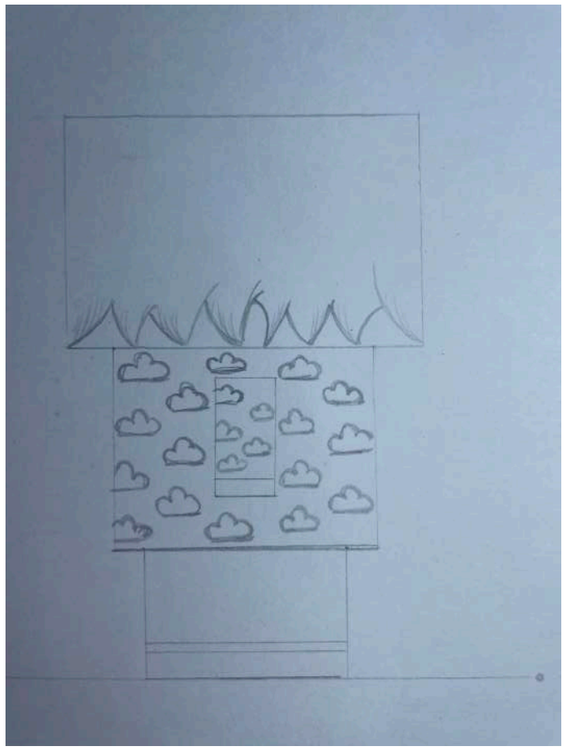

Figure 3.8: Side View [Photograph]. (Strauss, 2025).

Figure 3.9: Front View of constructed character [Photograph]. (Strauss, 2025).

I chose this one to refine because I always have a big imagination. I did not change much because I loved the character as is. I did decide to use fewer clouds on the sweatshirt on the final character because the clouds felt too much. I also tried to draw everything with the correct proportions.

WEEK 4

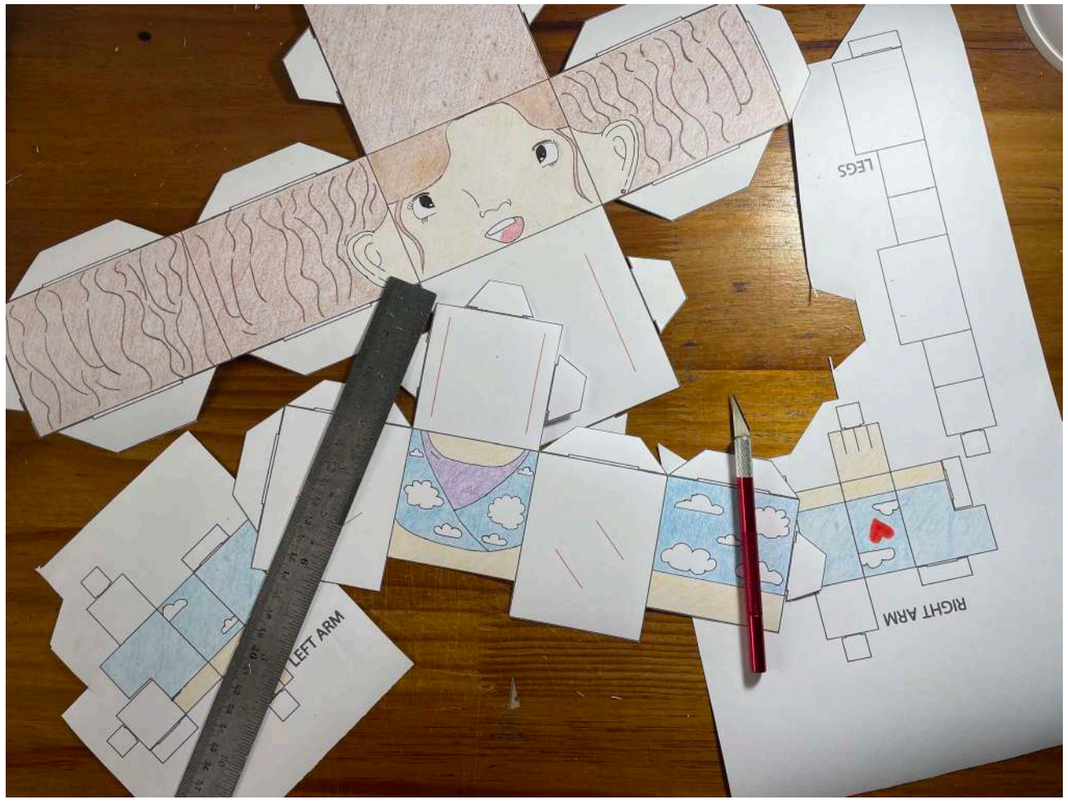

Figure 4.1: Process Shot Drawing the Final Character [Photograph]. (Strauss, 2025).

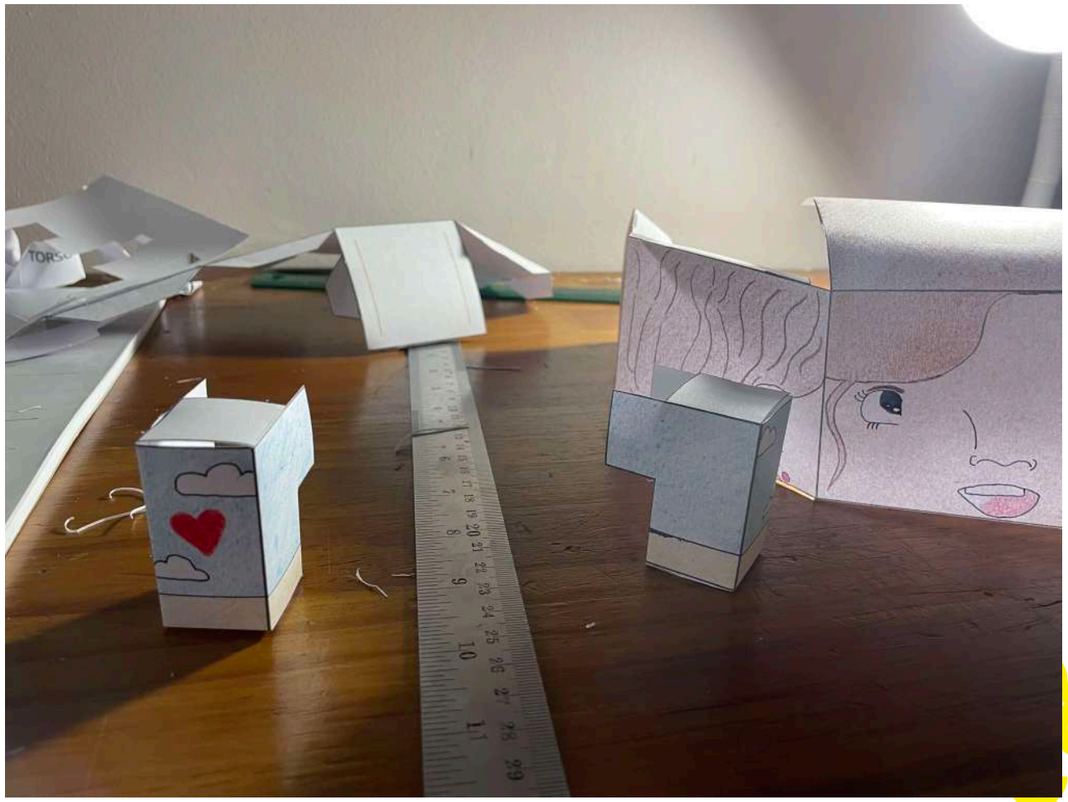

Figure 4.2: Process Shot making the Final Character [Photograph]. (Strauss, 2025).

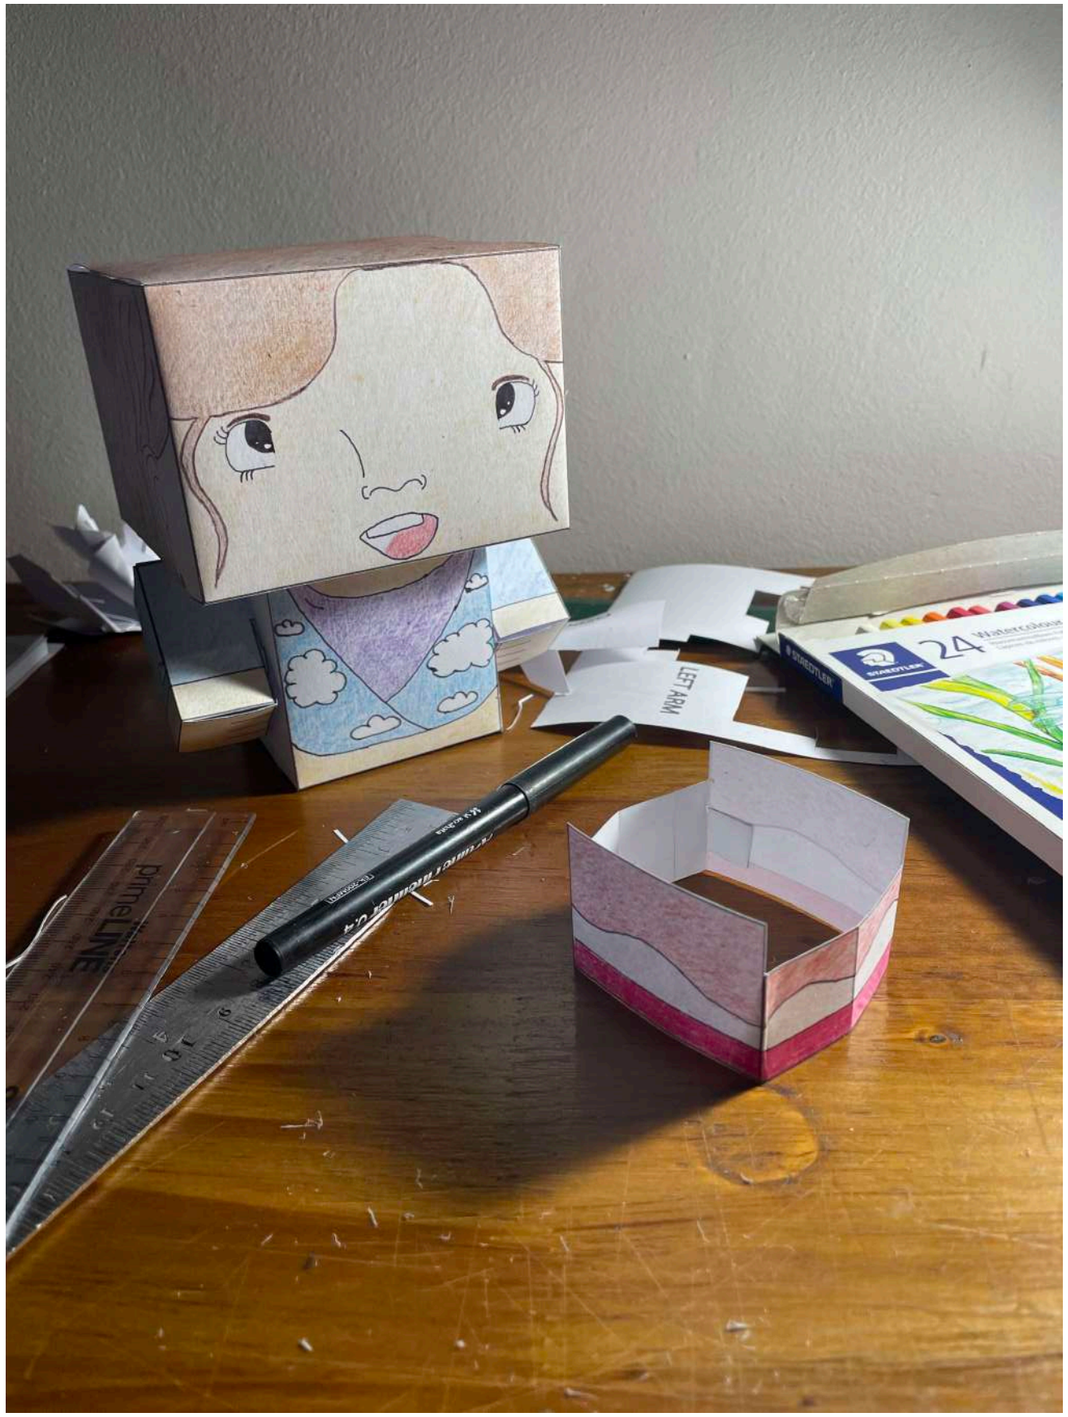

Figure 4.3: Process Shot - Making the final character [Photograph]. (Strauss, 2025).
